

Overview

VS-AU series is a PWM charge controller with LCD display and two USB ports. When the gap between solar panel working voltage and battery voltage is not big, choosing this PWM series is an equally reliable but more cost-effective solution. It is widely applied to rural Electrification and home power systems etc.

Features

- Series PWM charging mode
- Full power working at a working temperature range
- Multiple load control modes
- Adopt high quality, high-reliability international brand components
- Double USB design
- Segment LCD display design
- Real-time energy statistics function
- Extensive electronic protection
