intAct AGM-Power

Supply batteries | filled and charged
Completely maintenance free | AGM technology

This battery achieves its extraordinary capacity thanks to the electrolyte set in a fibreglass separator and the recombination technology of the

vent caps. These batteries are used in recreational vehicles as well as for a number of smaller solar and supply applications.

Battery	Volt	Capacity	Length mm	Width mm	Height mm	Position of terminal	Terminal	Hold down	Quantity
AGM55	12	55 AH (c20), 70 AH (c100)	242	175	190	0	1	B13	
AGM65	12	65 AH (c20), 90 AH (c100)	278	175	190	0	1	B13	
AGM90	12	90 AH (c20), 110 AH (c100)	353	175	190	0	1	B13	
AGM100	12	100 AH (c20), 120 AH (c100)	358	175	233	0	1	B13	
AGM130	12	130 AH (c20), 150 AH (c100)	513	189	223	3	1		
AGM180	12	180 AH (c20), 200 AH (c100)	518	223	223	3	1		
AGM200	12	200 AH (c20), 230 AH (c100)	518	276	242	3	1		

Product line: intAct AGM-Power, 12 V AGM batteries
Model: AGM technology – grid plates – sealed – completely maintenance free
Status: GUG = wet charged
Quality: OEM quality
Storage life: Storage life of up to 9 months
Cycle stability: 300 charging cycles

Technology: Fibreglass separators – electrolyte set in glass fibres
Degassing: Recombination technology with vent caps
Properties: Low self-discharge – completely maintenance free
Use: recreational and sports vehicles
