KLASS

KLASS FOR LIFESTYLE

product catalogue

In 1973, **Mestas Metal Endüstri ve Sanayi A.Ş.** was founded in Kayseri. Our company specialises in designing and manufacturing a wide range of products varying from **free standing ovens, semi professional ovens, built in ovens, built in hobs, cookers, to quartz electrical heaters** and one of the leading companies in Turkey.

Mestas, continues its activities on a 42.000 squaremeter opened area and 28.400 squaremeter closed area with the modern technology and put its products on markets under the brand name **"Klass"**.

In line with capacity expansion, our company also keeps up its productions returns on full capacity with the technology by employing advanced computerised machinery. Our company differ from those of similar organisations by taking into account aesthetics, ergonomoy and safety aspects in the design and manufacturing process, by using first quality material on every production process and employing highly qualified engineers and specialists in their field. We have been awarded by **CE, GS, CB SASO, SONCAP**, and some other quality certifications for different international markets due to this specializes.

On the other hand; design development, prototype and pilot production, on-line and off-line quality control systems above all; continuous market research are the drivers of our company's success.

We are aware of the fact that one of the most important factors in realizing our vision of becoming a leader in international markets is ensuring the continuous development of our employees who constantly review their jobs and seek better and newer methods. That's why we hold regularly seminars and further education to all our employees. By this way we can optimize the individual outputs, so our company aspires to ensure customer satisfaction and sound growth by providing products and services of high universal quality and standards.

Due to our mentioned above and company policy, our products are being exported to **Europe, Africa, Central America, South America, Middle East and Gulf countries**. We have done business with lots of companies from more than **90 different countries** and have had a good working relation with all of them, with no complaints from our customers.

KLASS

KLASS offers extensive product ranges of **Built-in oven, Freestanding oven, Built-in hob, Heater, Portable hob.**

For over 44 years, Klass has developed a strong relationship with its consumers, based on trust and proximity. Since its creation, Klass has pursued one simple mission: to support consumers throughout their lives by offering them innovative, useful and relevant products.

By closely analysing consumer habits, Klass develops its offer to reflect changing lifestyles and growing environmental awareness.

Enameled burner cover
Enameled top grid
Simultaneous use of all burners

A woman with long brown hair, wearing a blue knit beanie, a thick blue scarf, and a white cable-knit sweater, is looking upwards with a joyful expression. She is standing in a snowy environment with snowflakes falling around her. The background is a bright, overexposed snowy landscape. The image is split into three main sections: a top-left section showing a close-up of a yellow and white striped ceiling, a middle red section with the word 'HEATERS', and a bottom section showing the woman in the snow.

EASY REMOVABLE & EASY CLEAN

Maintenance and cleaning of the oven door

Lift by pressing on plastic latches on left and right side as shown and pulling the profile toward yourself.

Glass is released after profile is removed as shown. Remove the released glass by pulling toward yourself carefully. Outer glass is fixed to oven door profile. You can perform glass cleaning easily after glasses are released.

As for the glass that remains in the interior, first pull it slightly toward you in the direction of the arrow as shown and lift the bottom holders up slightly, then lift it slightly upwards.

Maintenance and cleaning of the wire rack

It is possible to clean by removing the wire shelf system located on the right and left wall of your device. Release the wire by pulling it in the downward direction of the arrow as in the bottom wire of the wire rack. Complete the disassembly by pulling the hook on the top of the free-standing wire shelf from the slots on the side wall and pulling the bottom part in the direction of the arrow at an angle. It is possible to replace the wire by reversing the operations you have already done to replace it.

Accessory

One wire grill and one tray are provided as standard in the device. Other accessories are optional. Does not come into the oven.

Tray

Used for pastry (cookie, biscuit etc.), frozen foods.

Wire grill

It is used for frying or to place baked, fried and frozen food in desired shelf.

Telescopic Rail

Trays and wire racks can be removed and installed easily thanks to telescopic rails.
